

# **R13**

## Set No. 1

## IV B.Tech II Semester Regular/Supplementary Examinations, April - 2018 GREEN ENGINEERING SYSTEMS

#### (Mechanical Engineering)

#### Time: 3 hours

#### Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

1.	a)	Discuss the features of Solar Photo Voltaic system.	[4]
	b)	What are the main applications of a solar pond? Describe briefly.	[4]
	c)	Enumerate the main applications of biogas.	[3]
	d)	What are the advantages and disadvantages of a fuel cell?	[4]
	e)	What do you understand by green manufacturing systems?	[3]
	f)	Explain the role of bamboo and rammed earth in the construction of green buildings.	[4]
			Γ.]
		$\underline{\mathbf{PART}}_{\mathbf{B}} (3x16 = 48 Marks)$	
2.	a)	Why orientation is needed in concentrating type collectors? Describe the	
	,	different methods of sun tracking.	[8]
	b)	Estimate the rate at which the sun emits energy. What fraction of this energy is	
		intercepted by the earth and what is the amount intercepted?	[8]
3.	a)	Describe the layout and working of a continuous solar cooling system.	[8]
	b)	Discuss the advantages and disadvantages of horizontal and vertical axis	
		windmill.	[8]
4.	a)	Discuss different systems used for generating the power using geothermal	
		energy, in brief.	[8]
	b)	What are the factors, which affect the size of the bio-gas plants?	[8]
~	- )		101
5.	a) b)	Describe the principle of working of a fuel cell with reference to $H_2$ -O <sub>2</sub> cell.	[8]
	b)	Discuss the relevance of energy efficient technologies in HVAC systems.	[8]
6.		Explain in detail, the environmental impact of current manufacturing practices	
		and systems.	[16]
-			503
7.	a)	Elaborate the green building concept. Give any one example of green building.	[8]
	b)	Explain the different roofing systems used in green buildings.	[8]

# **R13**

## Set No. 2

### IV B.Tech II Semester Regular/Supplementary Examinations, April - 2018 GREEN ENGINEERING SYSTEMS

(Mechanical Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

	$\frac{\mathbf{I}\mathbf{A}\mathbf{K}\mathbf{I}-\mathbf{A}}{\mathbf{I}\mathbf{Z}\mathbf{Z}}$	
a)	Discuss the main applications of Solar Photo Voltaic system?	[4]
b)	Write notes on Solar distillation.	[4]
c)	What is bio-mass? How it is useful?	[3]
d)	Write short notes on the applications of fuel cell.	[3]
e)	Discuss about alternate casting techniques.	[4]
f)	Explain the role of timber and lime pozolana cement in the construction of	
	green buildings.	[4]
	$\underline{\mathbf{PART}}_{\mathbf{B}} (3x16 = 48 Marks)$	
a)	How does a Photo Voltaic cell works? Explain with suitable diagram.	[8]
b)		
	collector used in power plant for generation of electrical energy.	[8]
	SI	
a)		
		[8]
b)	0 1	501
	generation of windmill?	[8]
0)	Explain the principle of open evels OTEC system with suitable diagram	۲Ø٦
		[8]
0)	1 1 0	[8]
	generation of blogas:	[0]
a)	What is the principle of fuel cell? Discuss problems associated with operation	
u)		[8]
b)		[8]
0)		[~]
	Discuss the design and implementation of efficient and sustainable green	
	production system with an example.	[16]
a)	Discuss the necessity of understanding the basic concept of green buildings.	[8]
b)	Describe energy management system and its importance.	[8]
	<ul> <li>b)</li> <li>c)</li> <li>d)</li> <li>e)</li> <li>f)</li> <li>a)</li> <li>b)</li> <li>b)</li> <li>b)</li> <li>c)</li> &lt;</ul>	<ul> <li>a) Discuss the main applications of Solar Photo Voltaic system?</li> <li>b) Write notes on Solar distillation.</li> <li>c) What is bio-mass? How it is useful?</li> <li>d) Write short notes on the applications of fuel cell.</li> <li>e) Discuss about alternate casting techniques.</li> <li>f) Explain the role of timber and lime pozolana cement in the construction of green buildings.</li> <li>a) How does a Photo Voltaic cell works? Explain with suitable diagram.</li> <li>b) Enumerate the different types of concentrating type collectors. Describe a collector used in power plant for generation of electrical energy.</li> <li>a) With the help of a neat sketch, describe a solar heating system using water heating solar collectors. What are the advantages and disadvantages of this method?</li> <li>b) Discuss the methods which are used to overcome the fluctuating power generation of windmill?</li> <li>a) Explain the principle of open cycle OTEC system with suitable diagram.</li> <li>b) Explain the principle of fuel cell? Discuss problems associated with operation of fuel cell.</li> <li>b) Give an account of different lighting technologies.</li> <li>c) Discuss the design and implementation of efficient and sustainable green production system with an example.</li> <li>a) Discuss the necessity of understanding the basic concept of green buildings.</li> </ul>

# Set No. 3

### IV B.Tech II Semester Regular/Supplementary Examinations, April - 2018 GREEN ENGINEERING SYSTEMS

#### (Mechanical Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

1.	a)	Discuss the limitations of solar photovoltaic system.	[3]
	b)	Write notes on Solar chimney. What are the different sources of geothermal energy?	[4]
	c) d)	How fuel cells are the future option for our energy needs? Justify your answer.	[4]
		Discuss the benefits of green manufacturing systems.	[4] [3]
	e) f)	Explain the role of hollow blocks and agro materials in the construction of green buildings.	[3]
		<b>PART–B</b> $(3x16 = 48 Marks)$	
2.	a)	Explain the working of pyranometer with the help of a neat sketch.	[8]
	b)	What are the main components of a flat plate solar collector, explain the function of each.	[8]
3.	a)	Describe in brief, the different energy storage methods used in the solar system.	[8]
	b)	What is the basic principle of wind energy conversion? Derive the expression for power developed due to wind.	[8]
4.	a)	State the limitations of OTEC system.	[8]
	b)	What is meant by anaerobic digestion? What are the factors, which affect bio- digestion? Explain briefly.	[8]
5.	a) b)	Write short notes on compressed air storage. What are variable frequency devices? Mention their benefits over other devices.	[8] [8]
6.		Explain the selection of environment friendly materials in manufacturing.	[16]
7.	a) b)	Discuss the features and benefits of green buildings. Explain the different sustainable practices used in the planning of green	[8]
	0)	buildings for mass comfort.	[8]

# **R13**

## Set No. 4

### IV B.Tech II Semester Regular/Supplementary Examinations, April - 2018 GREEN ENGINEERING SYSTEMS

#### (Mechanical Engineering)

Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

1.	a)	What are the major components of photovoltaic systems?	[4]
	b)	Write notes on Solar cooking.	[3]
	c)	How bio-energy may be useful for rural applications? Justify your answer.	[4]
	d)	Write short notes on the types of electrodes for a fuel cell.	[4]
	e)	Discuss in detail about alternate joining techniques.	[3]
	f)	Explain the role of ferro-concrete and industrial waste in the construction of	
		green buildings.	[4]
		$\underline{\mathbf{PART}}_{\mathbf{B}} (3x16 = 48 \text{ Marks})$	
2.	a)	Explain the Angstrom compensation pyrheliometer, with the help of a neat	
		sketch.	[8]
	b)	What are the advantages and disadvantages of concentrating collectors over flat	
		plate collectors?	[8]
3.	a)	What is the principle in the collection of solar energy used in a non-convective	
		solar pond? Describe a non-convective solar pond for solar energy collection and	
		storage.	[8]
	b)	Describe with a neat sketch the working of a wind energy system with main	
		components.	[8]
4.	a)	Explain with the help of diagram, the principle of closed cycle OTEC system.	[8]
	b)	Explain the constructional detail and working of KVIC digester.	[8]
5.	a)	Write short notes on pumped hydro electric storage.	[8]
	b)	Discuss the aims and scopes of demand site management.	[8]
_			
6.	a)	Discuss the advantages and disadvantages of green manufacturing systems over	5.01
	• 、	other systems?	[8]
	b)	What is zero work manufacturing? Explain in detail.	[8]
7.		Evaluin in detail the quotainship site selection for snear buildings	гo
	a) b)	Explain in detail the sustainable site selection for green buildings.	[8]
	b)	Write short notes on the paints to reduce the heat gain of the buildings.	[8]
