

Code No: RT4104E

## **R13**

## IV B.Tech I Semester Supplementary Examinations, February/March - 2018 NETWORKS SECURITY AND CRYPTOGRAPHY (Electronics and Communication Engineering)

## Time: 3 hours

Max. Marks: 70

Question paper consists of Part-A and Part-B Answer ALL sub questions from Part-A Answer any THREE questions from Part-B \*\*\*\*\*

## PART-A (22 Marks)

a)	Define Threat and Attack & What are the types of attacks on encrypted	
	message.	[4]
b)	What is the block size in DES? What is the cipher key size in DES? What is	
,	the round key size in DES?	[4]
c)	Find the results of the following using Fermat's theorem:	
	(i) $5^{15} \mod 13$ (ii) $15^{18} \mod 17$	[4]
d)	Define weak collision property of a hash function.	[4]
e)	Draw the general format for PGP message.	[3]
f)	List down the four phases of virus.	[3]
	<b>PART–B</b> $(3x16 = 48 Marks)$	
a)	Discuss the following:	
,	i. ARP attacks, route table modification	
	ii. Buffer overflow & format string vulnerabilities	[8]
b)	Explain the various types of cryptanalytic attacks.	[8]
/		
a)	Explain the Key generation process in data encryption standard (DES)	
,	algorithm.	[8]
b)	Explain the generation sub key and S Box from the given 32-bit key by	
<i>,</i>	Blowfish.	[8]
a)	Discuss clearly about fermat and Eluer's theorem with example.	[8]
b)	Perform encryption and decryption using RSA Algorithm with the given P=5;	
	q=13; e=19; M=6.	[8]
a)	Discuss clearly about the objectives of HMAC and it security features.	[8]
b)	Write and explain the digital signature algorithm.	[8]
a)	Explain how PGP provides authentication and confidentiality for email	
	services and for the transfer applications.	[8]
b)	Discuss about the SSL architecture.	[8]
a)	Discuss about encapsulating security payload of IP.	[8]
b)	Explain the types of Host based intrusion detection. List any two IDS software	
	available.	[8]
